

ULTRABOOKS

ULTRABOOK™ – A CLASS OF ITS OWN

Finally, a class of notebooks that lives up to your expectations.

Ultra-flat and elegant, with exceptionally fast response times.

Incredibly fast

Ultrabooks™ are Intel's class of especially powerful portable computers. They feature 2nd-generation Intel® Core™ processors for lightning-speed booting and amazingly fast operation.

Unbelievably flat

With a height of less than 20.3 mm (0.8"), Ultrabooks™ are extraordinarily flat, and at just 1.4 kilogrammes, they're real lightweights. At most, Ultrabooks™ are half as thick and heavy as the average notebook.

Exceptionally elegant

They also feature an elegant, aesthetic design, high-quality materials and excellent workmanship.

Extraordinarily secure

Integrated Intel security technologies provide increased protection for your personal information and against theft. For example, you can use the integrated Intel® Anti-Theft (Intel® AT) technology to block access to your data from anywhere in the world in case of theft, while Intel® Identity Protection Technology (Intel® IPT) protects your personal information.

Ultrabooks combine all that notebooks and tablet PCs have to offer for mobile professionals: full notebook functionality and high mobility with an elegant design and a long battery life.

The next dimension in workplace mobility – ULTRABOOK™
